Zoning and controls · Kits and cables

Six-core motor cable, 15 m

A 15 metre six-core lead that joins each damper actuator to the zone controller. It carries low-voltage power and the control signal in one run, with RJ11 6P6C plugs at both ends.

Part numbers

Part number	Description	Size (mm)	Unit
AS-CBL-6C-15M	Six-core motor cable, 15 m	15 m	Each

Key specifications

Length	15 m
Cores	6
Connectors	RJ11 6P6C, both ends

General

Length	15 m
Cores	6
Connectors	RJ11 6P6C plug, both ends
Maximum run, controller to actuator	20 m

Overview

Each damper needs power and a control signal. This lead carries both in a single run, so you pull one cable per zone, not two.

It plugs in at both ends. Nothing is made off on site, so every core keeps its function and a suspect run can be swapped for a known-good lead in minutes.

The maximum run from controller to actuator is 20 metres. The 15 metre length reaches the far rooms of most homes with spare for routing and a service loop.

Typical applications

New zoning installs · Adding zones · Replacing damaged runs
