Air distribution · Linear and slot diffusers

Plaster-in linear diffuser

A linear diffuser with a plaster-in flange. It sets flush into a Gyprock ceiling, so the finished outlet has no visible frame.

Part numbers

Part number	Description	Size (mm)	Unit
AS-LDP-600100	Plaster-in linear diffuser 600 × 100	600 × 100 neck	Each

Key specifications

Neck size	600 × 100 mm
Material	Aluminium
Ceiling	Plasterboard (Gyprock), set flush

General

Product type	Plaster-in linear diffuser
Material	Aluminium
Neck size	600 × 100 mm
Installation	Set flush into plasterboard (Gyprock) ceilings

Overview

A plaster-in diffuser is fixed into the ceiling before the plasterer sets and finishes the joints. Once painted, the outlet sits flush with the ceiling and the frame disappears.
It suits high-end residential and commercial interiors where a clean ceiling line matters.

Typical applications

High-end homes and apartments · Display homes · Boutique retail and hospitality · Offices with plasterboard ceilings
