Shaft adapter kit for F03

Joins the F03 actuator to the damper spindle. You get one electroplated die-cast adapter with a 6 × 6 mm square hole and two copper sleeves for a snug fit. Backed by a lifetime replacement warranty.

Part numbers

Part number	Description	Size (mm)	Unit
AS-SAK-F03	Shaft adapter kit for F03	6 × 6 mm drive	Kit

Key specifications

Drive	6 × 6 mm square
Contents	1 die-cast adapter, 2 copper sleeves
Finish	Electroplated
Warranty	Lifetime replacement

General

Adapter drive	6 × 6 mm square hole
Contents	1 die-cast adapter, 2 copper sleeves
Sleeve size	9.32 mm, 4.11 mm thick
Finish	Electroplated
Warranty	Lifetime replacement

Overview

The joint between the actuator and the damper is where many zoning problems start. A loose coupling works on day one, then slowly rounds out until the damper stops short of full travel.

This kit is made for the F03's 6 × 6 mm square drive shaft. The two copper sleeves (9.32 mm, 4.11 mm thick) take up the fit on the damper spindle. The die-cast adapter is electroplated to resist corrosion.

Spindle sizes differ between dampers, so check yours before you order. If an adapter or sleeve fails, we will replace it, with no time limit.

Typical applications

Every new F03 install · Damper swaps on older systems · Fixing a slipping or worn coupling
